Warehousing and transportation services from the geographic heart of North America

JDF Distribution is a Dallas-based third-party logistics company that can help get your products to customers quickly, reliably, and at the lowest possible cost. With distribution centers in Houston and Dallas and a complete transportation management capability, JDF can be your single-source partner for product distribution from the South.

► **Central location lowers distribution costs, improves service**

JDF's primary DC is in Coppell, Texas, four miles from the DFW Airport outside Dallas – one of America's fastest growing logistics hubs. The Dallas/Fort Worth Metroplex has the lowest distribution cost to the top 50 U.S. consumer markets of any major U.S. logistics center. From here, you can reach 93% of the U.S. population via truck in 48 hours. For more critical shipments, DFW Airport lets you reach 95% of the U.S. population within four hours. Our distribution center in Houston is also an economical distribution point for regional and national distribution.

Ground Transport Service Levels from Dallas

► **Strategic focus on consumer packaged goods**

JDF's retail logistics solution is designed for small and mid-sized consumer packaged goods (CPG) companies who don't want to own and manage their own distribution infrastructures. Our turnkey CPG logistics solution includes:

- Modern distribution facilities with full-featured warehouse management systems
- Value-added warehouse services to configure and package goods to specific retailer requirements
- Compliance with retailer routing guides

Warehousing Services

JDF Distribution provides warehousing services for local, regional and national distribution from Dallas and Houston. In total, we manage close to 500,000 square feet of modern warehouse space using an RF-enabled warehouse management system to increase efficiency and accuracy. Our systems are web-enabled so answers to questions on inventory and order status are just a few mouse clicks away. Specific services include:

- Value-added services such as repacking, kitting, light assembly
- Seasonal overflow
- Cross-docking
- Fulfillment

Transportation Services

We provide transportation management services for all modes of transport as part of an integrated warehousing and distribution solution. Our focus: giving small to mid-sized shippers the expertise, resources and personal service they need to manage freight efficiently. Specific services include:

- Local pick-up and delivery using our own fleet
- Regional and national freight brokerage using a network of select TL and LTL partners
- Special freight services including transport of high-value items requiring pad-wrapping, inside placement and other special services
- Home delivery of appliances and other large, high-value items

Import Logistics

JDF has the facilities and know-how to help companies move goods into and out of the U.S. Our Dallas warehouse, located along the I-35 NAFTA Superhighway, can serve as a hub for goods moving into or out of Mexico. The facility enjoys Triple Freeport Zone status, which avoids inventory tax on goods that come into the market and are shipped outside of Texas within 175 days. Our Houston warehouse serves customers that import through the growing Port of Houston. We can transport goods from the Port to our Dallas or Houston DC, where we can strip and transload containers.

Installation Logistics

New construction and remodeling projects rely on just-in-time delivery of furniture, fixtures and equipment (FF&E) from multiple suppliers. This is a difficult coordination process that, if mismanaged, can result in contractor downtime, budget overruns, project delays, and lost revenue. JDF's Installation Logistics solution provides hotels, resorts, retailers, restaurants, hospitals and design firms with a turnkey logistics solution for new construction. Services include warehousing near the install site, delivery of goods to the site, and final placement of FF&E. Our installation project managers are the most experienced in the industry, and the most successful in completing projects on-time and on-budget.

Don't get lost in the shuffle

Don't risk becoming a number at a large third-party logistics company or carrier. Partner with a company that can give you the personal attention you deserve.
