

JDF Distribution is a Dallas-based logistics-services provider that helps companies get products to market quickly, reliably, and at the lowest possible cost. Specific services include:

Warehousing –

Storage and computerized inventory control of consumer and industrial goods under short- or long-term contracts.

Transportation –

Transportation management, using our own fleet for local deliveries and established partners for regional/national distribution.

Import Logistics –

Warehousing and transportation to support cross-border trade with Mexico and goods imported through the Port of Houston

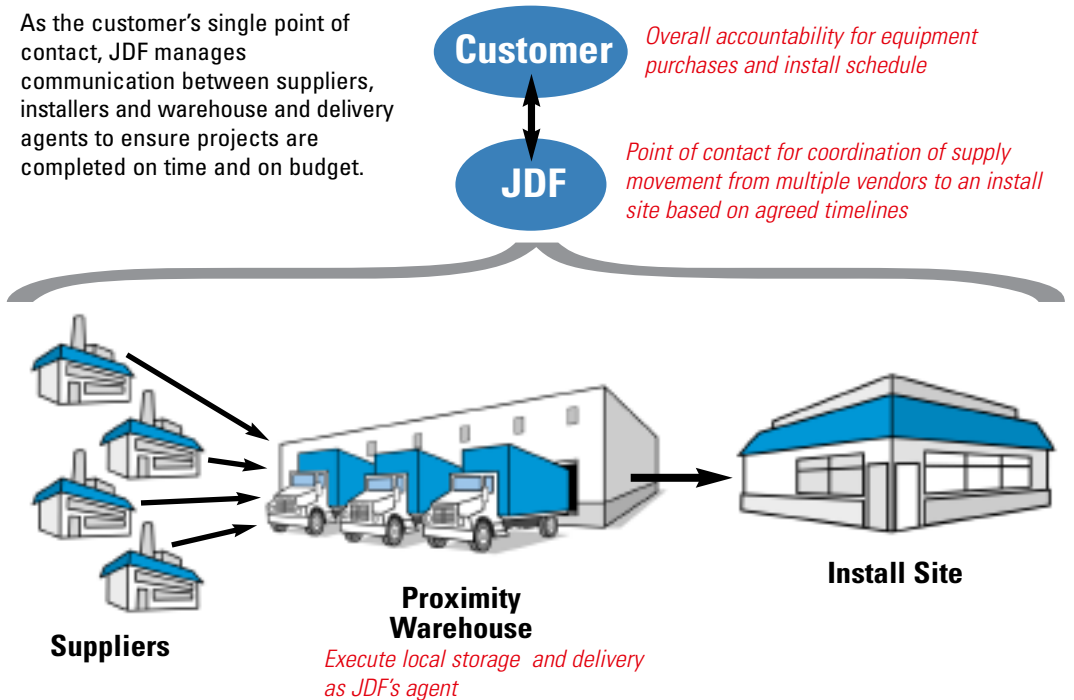

Installation Logistics –

Warehousing and delivery services in support of new construction and remodeling projects.

Ease your administrative burden and limit contractor downtime for new construction and remodeling projects

New construction and remodeling projects rely on just-in-time delivery of materials from multiple suppliers. But building sites are not set up to efficiently receive these shipments, so goods must be staged at a nearby warehouse and shuttled to the site, as needed. This is a difficult coordination process that, if mismanaged, can result in contractor downtime, budget overruns, project delays, and lost revenue.

The Installation Logistics solution from JDF Distribution provides hotels, resorts, timeshares, retailers, restaurants, hospitals, and design firms with a turnkey logistics solution for furniture, fixture and equipment (FF&E) installation, including warehousing, transportation and final placement. Since 1995, JDF has managed thousands of FF&E installs and developed a reputation for delivering projects on-time and on-budget.

► Installation Logistics Services

- **Project management.** You'll be assigned a dedicated Installation Manager who understands the stakes and will make sure you stay informed every step of the way. This single point of contact makes communication easy and keeps you in control – without getting buried in paperwork and coordination details. If you need an answer off hours, we'll provide emergency contact numbers, so you're never in the dark.

To manage large-scale installations involving hundreds of vendors and other suppliers, JDF developed the Matrix 2.0 project management system. At the start of a project all pertinent details, such as required equipment inventories, purchase order detail and project mile stones, are loaded into Matrix 2.0. The system allows our team to manage the project down to the smallest detail. And allows you online access – 24 hours a day – eliminating the need to chase people down for status updates.

JDF Distribution is the logistics services division of Daryl Flood Mobility Solutions (DFMS). In addition to logistics, DFMS provides household and business relocation services.

- **Warehousing.** With a service network of more than 1,500 facilities worldwide, JDF has representation in almost every major and mid-sized market across North America. Typically, we can source warehouse space within 20 miles of a project. JDF's warehouse network gives you:
 - Fast, easy access to local storage and delivery partners who are pre-qualified
 - Improved service and lower freight costs because local logistics partners are closer to destination points
 - Consistent execution across multiple markets
- **Freight transportation.** JDF can manage freight shipments from the manufacturer all the way to the warehouse or install site. Our team calls vendors and routes the freight to minimize the need for warehousing. We choose the appropriate carrier based on the type of goods being shipped. All partner agents have lift-gate and specialty equipment and will deliver off hours to support night and weekend installations. The status of freight shipments is loaded into our project management software and immediately visible to you.
- **Placement and FF&E installation.** JDF's on-site Project Manager will control all scheduling of inbound items and staff the job site accordingly. Successful placement of FF&E is all about details. Our team bases placement decisions on a thorough examination of the exact items list and purchase orders, floor plans, spec books, room layouts, and electrical details. JDF will use skilled professionals for installation of all wall hung items per the elevations supplied by the designer or owner.

► Specializing in Hotel Installation

JDF Distribution specializes in hotel, resort and timeshare installations. Since 1995, we've managed installation projects totaling hundreds of thousands of rooms across the U.S., Canada and the Caribbean. JDF's project managers are the most experienced in the industry, and the most successful in completing hotel installations on-time and on-budget.

We'd like to be your partner for installation projects. Call or email us today to discuss how we can help you achieve your goals.
