

JDF Distribution is a Dallas-based logistics-services provider that helps companies get products to market quickly, reliably, and at the lowest possible cost. Specific services include:

Warehousing –

Storage and computerized inventory control of consumer and industrial goods under short- or long-term contracts.

Transportation –

Transportation management, using our own fleet for local deliveries and established partners for regional/national distribution.

Import Logistics –

Warehousing and transportation to support cross-border trade with Mexico and goods imported through the Port of Houston

Installation Logistics –

Warehousing and delivery services in support of new construction and remodeling projects.

JDF Distribution is the logistics services division of Daryl Flood Mobility Solutions (DFMS). In addition to logistics, DFMS provides household and business relocation services.

Personalized transportation management for small and mid-sized customers

Transportation is the largest line item on the logistics budget, but many small to mid-sized companies lack the resources, systems and volume leverage to manage the function efficiently. They struggle to source the capacity they need – and probably pay more than they should. Some leverage freight brokers, who can help identify cost-effective carriers. But brokers and forwarders are not necessarily the right solution for shippers seeking a strategic partner for distribution – a company that will understand their unique transportation requirements and source, book, monitor and confirm shipments on their behalf.

JDF Distribution provides transportation management as part of an integrated warehousing and distribution solution from Dallas and Houston. Local pick-ups and deliveries capitalize on JDF's fleet of late-model trucks, while JDF's carrier-partner network executes regional and national distribution. Our focus is on giving small to mid-sized customers the expertise, resources and personal service they need to manage freight. We work with a select group of customers who want and need a level of personal service they cannot get from a broker or common carrier. Many transportation management customers use JDF to manage an integrated warehousing and distribution solution.

► **Our dedicated fleet assures available capacity for local deliveries and special freight.**

For local pick-ups and deliveries, we operate a fleet of late-model, air-ride vehicles, most with liftgates, providing basic, pad-wrapped and strapped service. The fleet includes flatbeds. As a division of Daryl Flood Mobility Solutions, a relocation expert, JDF has access to uniformed, professional crews, trained for inside placement and handling high-value, fragile shipments. For instance, JDF manages the regular shipment of 70 truckloads of high-value museum artifacts. During this project, a JDF coordinator is available 24/7 to assure good communication and compliance with tight delivery windows.

For local pick-ups and deliveries, JDF operates a fleet of late-model, air-ride vehicles, most with liftgates, providing basic, pad-wrapped and strapped service.

► **Our network of TL and LTL partners enables JDF to manage your regional and national distribution requirements.**

JDF's network of truckload carriers consists primarily of smaller carriers with a strong service orientation, for whom JDF is a large and important customer. Many do daily scheduled pickups at JDF facilities and have been partners since we began building the network in 1982. These longstanding relationships let us offer you capacity and guaranteed service delivery times.

► **Our experienced crews and fleet provide premium home delivery solutions for appliances and other large, high-value items.**

For retailers needing to deliver products directly into the homes of consumers in Greater Dallas and Houston, JDF provides both the specialized vehicles and experienced crews to manage timely, damage-free deliveries. Special services, such as setup, installation and debris removal, can be arranged.

► **Other key features of JDF's transportation solution include:**

- Complete coordination for large rollouts, from carrier selection to payment processing
- Full-value protection insurance available

It's easy to get lost in the shuffle at a large 3PL provider, especially if you are a small to mid-sized company. At JDF, we make a living serving companies that demand responsive logistics partners. After all, we are a small, family-owned business with owners who answer your calls, get involved, and have a stake in your total satisfaction.

We'd like to be your transportation partner in Texas. Call or email us today to discuss how we can help you achieve your goals.
